Save on the cost of purchasing single items with the Vision Techconnect Lite 10m Bundle Kit: TC2-LT+LT10MCABLES.

> Future-proof clip-in modular faceplate package
> Plug-in cables (No soldering require)
> Basic selection of modules required for a professional installation.

Vision Techconnect TC2-LT+LT10MCABLES pack allows seamless integration of connectivity, audio, and control. Techconnect is the only family of products which seamlessly integrates connectivity, audio, and projector control. It is simple enough that even an inexperienced technician can install it, and it doesn't require soldering at all due to its phoenix connector captive screw design.

The Techconnect TC2 range features an attractive architectural front surround system making it suitable for corporate and home-cinema applications, plus robust clip-in modules which make it super-quick, flexible and easy to install.

Techconnect TC2 are Quick and Easy, Simple enough that even an inexperienced technician can install it. No soldering is necessary due to its phoenix connector captive screw design.

Vision Techconnect TC2 Modules feature plug-in connectors on the rear. Cables come pre-terminated with male connectors which are simply plugged into the rear of the module. Need to shorten or pull a cable? No problem just unscrew the phoenix connector. Techconnect gives you the speed of a pre-terminated system with the flexibility you sometimes need.

The modules are interchangeable, Need a different or additional module you can simply buy just the module you want, and add it to the Lite package or existing plate.All modules, backboxes, surrounds, and cables (in 10, 15, and 20m lengths) are available individually or come in packages. Packages are a flexible way of customizing the faceplate to meet your needs, and they represent best value.
